

## Multimedia Filters

In March 2013, Pure Aqua successfully manufactured and supplied a multi-media and activated carbon filtration package to a major company in the USA to remove chlorine and suspended solids from well water. The filtration package is composed of multimedia and activated carbon SS tanks, and Top mounted valves. The multi-media filter was selected from our MF-450 Series. 31F2070MM-SS uses a 20" diameter tank. The activated carbon filter was also selected from our MF-450 Series. 31F24100 AC uses a 24" diameter tank. Both were chosen to handle a flow rate of 31 GPM. Since its startup, the filtration package has been running smoothly with minimal trouble-shooting.

### System Overview

Location:	USA
End-User:	A major company in USA
Capacity:	31 GPM
Water Source:	City Water
Objective:	To remove chlorine, TSS, and turbidity from water
Application:	Potable & General Use
Start Up Date:	2013

Designed and  
Manufactured in  
Southern California,  
USA

Pure Aqua Inc. is an  
ISO:9001 certified  
company with over a  
decade of experience  
in advanced system  
design and  
manufacturing.

Using the latest  
technology in 3D  
Computer Aided  
Design (CAD) software  
allows for highly  
detailed and functional  
design. This reduces  
material cost and  
environmental impact,  
while maintaining  
quality and reliability.

Our modular systems  
are engineered for  
ease of integration and  
delivery to many  
locations worldwide.
